

EZ Phone EZ1 Geofence Guide

This guide will show you how to setup Geofencing and Notifications for your phone.

1. Go to <https://track.iluvwireless.com> and login to your account.
2. Click the dropdown icon in the upper right hand corner and select Geofences.

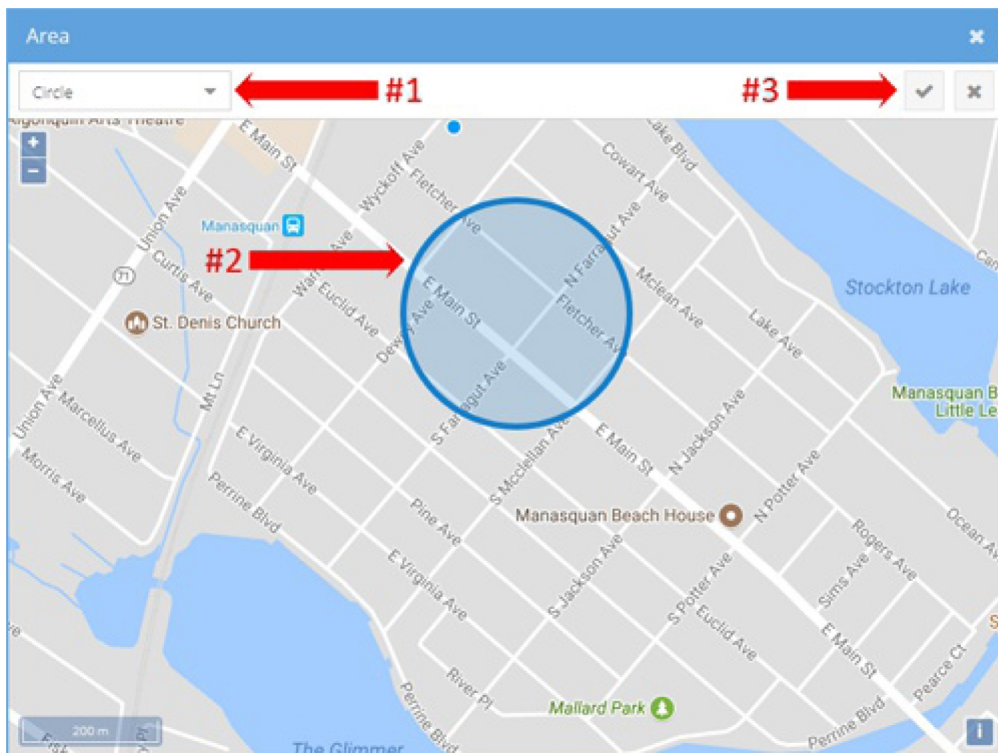

3. In the Geofences window follow step 1 to add a Geofence, step 2 to give your Geofence a name and step 3 to define the Geofence Area.

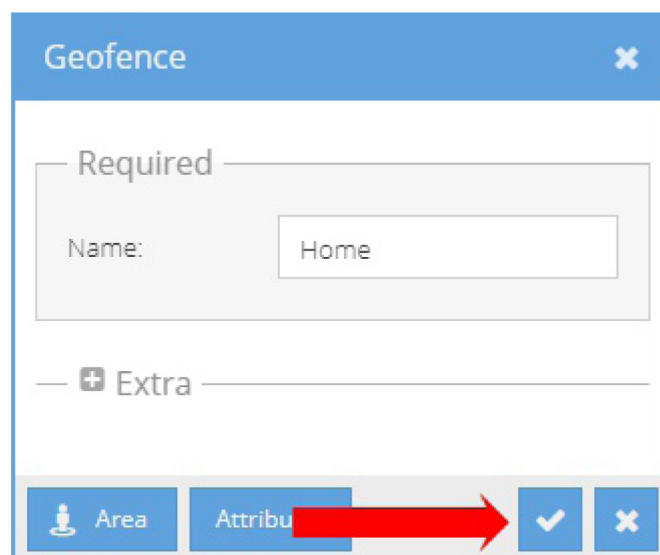

A screenshot of the 'Geofences' window. At the top, there's a blue header with the title 'Geofences' and a close button. Below the header, there's a table with two columns: 'Name' and 'Description'. A red arrow labeled '#1' points to a '+' button in the top left corner of the table. Below the table, a 'Geofence' form is open. A red arrow labeled '#2' points to the 'Name' field, which contains the text 'Home'. Below the 'Name' field, there's an 'Extra' field with a plus icon and a text input area. A red arrow labeled '#3' points to the 'Area' button at the bottom of the form. The form also has an 'Attributes' button and a close button (X) at the bottom right.

4. In the Geofence Area window follow step 1 to select the type of Geofence. Select either Circle or Polygon. In step 2 you left click your mouse button once and then move your mouse to expand the Circle. Left click the mouse button again when you achieved the desired size. If you want to change the placement then just repeat that process.

For Polygon, click the left mouse button to define the starting point then move your mouse to draw a line. Click the left mouse button again to define a point and continue till you draw a completed Polygon. When finished click the Checkmark in step 3.

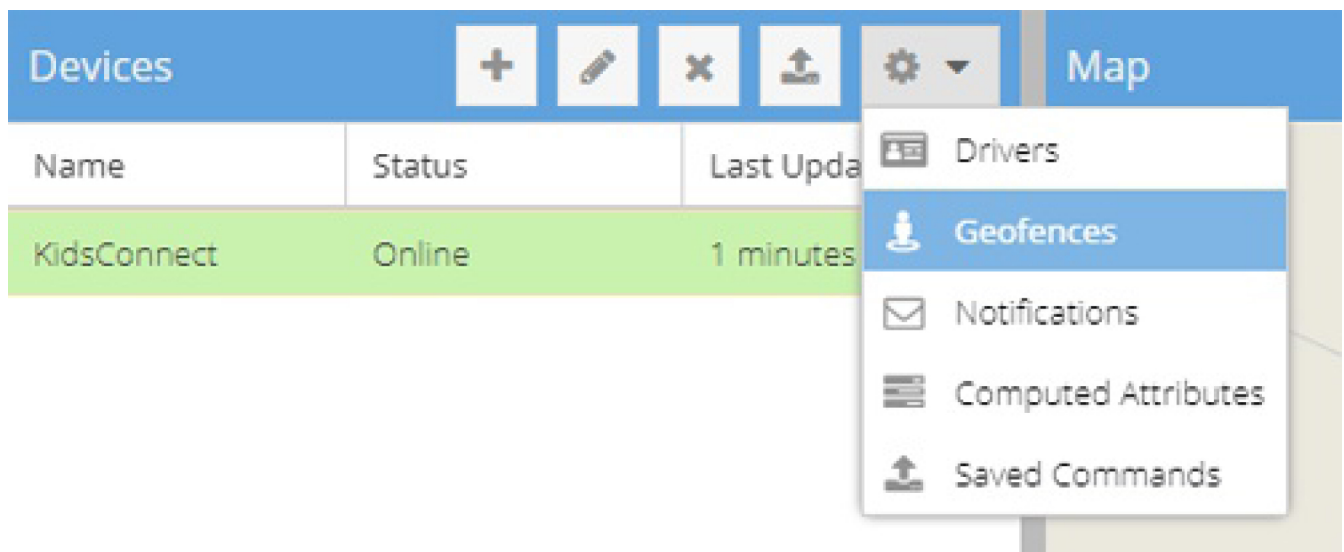

5. In the next step click the Checkmark on the Geofence window to save your settings.

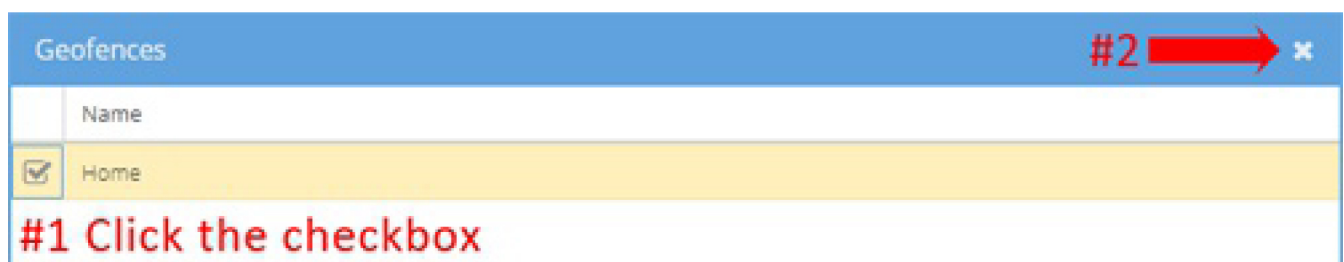

6. In the Geofences window click the X in the upper right hand corner to close the window.

Next we have to attach the Geofence we just created to the phone(s).

1. In the Devices Panel, select the phone you want to add the Geofence to.
2. Next click the dropdown icon in the upper left hand corner and select Geofences.

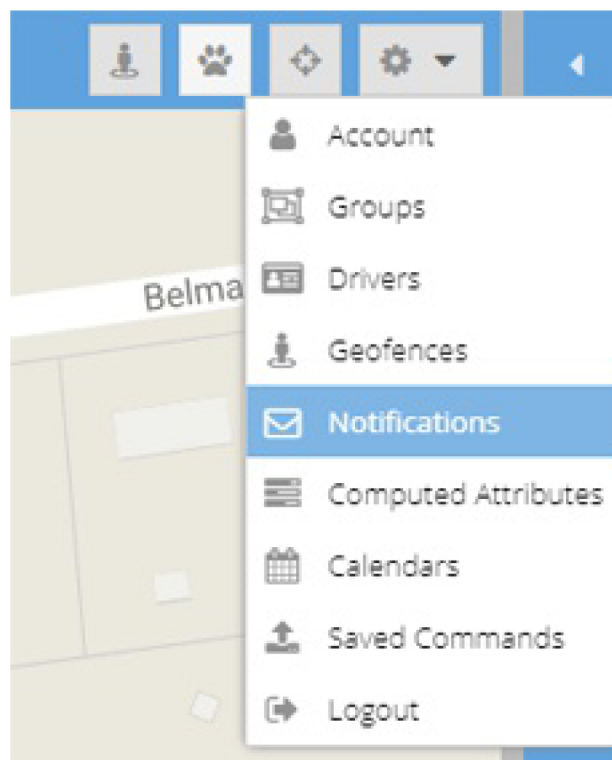

3. Click the checkmark box next to the Geofence name you want to enable. You can disable the Geofence by repeating this process and unchecking the box.

Setup Notifications for your Geofence(s).

1. Click the dropdown icon in the upper right hand corner and select Notifications.

2. In the Notifications window follow step 1 to add a new Notification. In step 2 select the type of notification (e.g. Device has entered geofence), select All Devices and then optionally select how you want to be notified. Currently only notifications via the Secure Tracker Website and E-mail are supported. SMS will be supported in the future. Finally in step 3 click the checkmark to Save the Notification.

The screenshot shows the 'Notifications' window with a blue header and a close button (X) in the top right. A red arrow labeled '#1' points to a '+' button in the top left. A modal window titled 'Notification' is open, showing a 'Required' section with a 'Type' dropdown set to 'Device has entered', 'All Devices' checked, 'Send via Web' checked, 'Send via Mail' checked, and 'Send via SMS' unchecked. A red arrow labeled '#2' points to the 'Type' dropdown. At the bottom of the modal, a red arrow labeled '#3' points to a blue checkmark button, next to an 'Attributes' button and a close button (X).

3. In the Notifications window click the X in the upper right hand corner to close the window. You can also add additional Notifications such as Device has exited geofence.

Next we have to attach the Notification we just created to the phone(s).

1. In the Devices Panel, select the phone you want to add the Notification to.
2. Next click the dropdown icon in the upper left hand corner and select Notifications.

The screenshot shows the 'Devices' panel with a blue header and a dropdown menu open. The dropdown menu lists 'Drivers', 'Geofences', 'Notifications' (highlighted), 'Computed Attributes', and 'Saved Commands'. The 'Devices' table below has columns 'Name', 'Status', and 'Last Update'. The first row is 'KidsConnect', 'Online', and '1 minutes'.

Name	Status	Last Update
KidsConnect	Online	1 minutes

3. Click the checkmark box next to the Notification you want to enable. You can disable the Notification by repeating this process and unchecking the box.

Notifications ✕					
	Type of Notification	All Devices	Send via Web	Send via Mail	Send via SMS
<input checked="" type="checkbox"/>	Device has entered geofence	Yes	Yes	Yes	No
